

Ajax Programming For The Absolute Beginner

Ajax Programming For The Absolute

I want to use jQuery ajax to retrieve data from a server. I want to put the success callback function definition outside the .ajax() block like the following. So do I need to declare the variable dataFromServer like the following so that I will be able to use the returned data from the success callback?. I've seen most people define the success callback inside the .ajax() block.

jQuery ajax success callback function definition
