Birds, also known as Aves or avian dinosaurs, are a group of endothermic vertebrates, characterised by feathers, toothless beaked jaws, the laying of hard-shelled eggs, a high metabolic rate, a four-chambered heart, and a strong yet lightweight skeleton. Birds live worldwide and range in size from the 5 cm (2 in) bee hummingbird to the 2.75 m (9 ft) ostrich.

After doing Incredibles 2, writer-director Brad Bird says he's not interested in doing sequels to any of his other film hits. Bird is one of those rare directors in the business who has found success in both the animated and live-action film genres. Cutting his teeth as a character layout artist, designer, and director on TV's The Simpsons in the early 1990s, Bird's big breakthrough in film ...

On these pages are the sounds of North American birds (Costa Rican birds have their own page, below) - not just bird calls or bird songs, but all the sounds birds make, such as wing sounds and bill rattles.

### **North American Bird Sounds - Naturesongs**

Based on the work on albatross genera, Robertson and Nunn went on in 1998 to propose a revised taxonomy with 24 different species, compared to the 14 then accepted. This expanded taxonomy elevated many established subspecies to full species, but was criticised for not using, in every case, peer reviewed information to justify the splits. Since then, further studies have in some instances ...
