Congruent and Similar Figures Practice Flashcards | Quizlet

We use these terms to classify two geometric figures and segments. Similar figures have the same shape, but they do not have the same size. If a figure or segment is congruent then it is the same in every respect. Similar figures are therefore not congruent. These classifications help us better understand the geometric systems.

Congruent and Similar Worksheets

Students learn that congruent figures are figures that have the same size and shape. Therefore, the corresponding angles of congruent figures are congruent, and the corresponding sides of congruent figures are congruent. Students are then asked to complete congruence statements about the sides and angles of given congruent figures.
