

## *Enterprise Information Portals And Knowledge Management*

### **Enterprise Information Portals And Knowledge**

An enterprise portal, also known as an enterprise information portal (EIP), is a framework for integrating information, people and processes across organizational boundaries in a manner similar to the more general web portals. Enterprise portals provide a secure unified access point, often in the form of a web-based user interface, and are designed to aggregate and personalize information ...

Many organizations have begun to realize that the data and information they create every day is a valuable enterprise asset. It is difficult to imagine any enterprise achieving its goals without pertinent information. Those with accessible and higher quality information will make more informed and more effective business decisions. This is as true for all organizations since all enterprises ...

### **Developing a Roadmap for an Enterprise Information ...**

Enterprise content management (ECM) extends the concept of content management by adding a time line for each content item and possibly enforcing processes for the creation, approval and distribution of them. Systems that implement ECM generally provide a secure repository for managed items, be they analog or digital, that indexes them.

The term “Intellectual Capital” collectively refers to all resources that determine the value of an organization, and the competitiveness of an enterprise. Understandably, the term “intellectual capital” from a human resources perspective is not easily translatable into financial terms. For all other assets of a company, there exists standard criteria for expressing their value.
