Charles Dow developed Dow Theory from his analysis of market price action in the late 19th century. Until his death in 1902, Dow was part-owner as well as editor of The Wall Street Journal. Although he never wrote a book on these theories, he did write several editorials that reflected his views on speculation and the role of the rail and industrial averages.

Richard Demille Wyckoff (1873–1934) was an early 20th-century pioneer in the technical approach to studying the stock market. He is considered one of the five “titans” of technical analysis, along with Dow, Gann, Elliott and Merrill. At age 15, he took a job as a stock runner for a New York brokerage.

Risk is the possibility of losing something of value. Values (such as physical health, social status, emotional well-being, or financial wealth) can be gained or lost when taking risk resulting from a given action or inaction, foreseen or unforeseen (planned or not planned). Risk can also be defined as the intentional interaction with uncertainty. ...

What an oasis to find in the desert of trading education! As I read through the 6 volumes of Lance's new e-book there was a constant stream of "wow" and "aaah...that makes so much sense".

YTC Price Action Trader

POC & VPOC. The point of control (POC) and volume point of control (VPOC) are sibling terms used in TPO and volume analysis, respectively. In TPO profiles, the POC is the price at which the most time was spent over the course of the profiled range - usually the price closest to the profile midpoint if there is more than one price at which the same amount of time was spent.
