In mathematics, monstrous moonshine, or moonshine theory, is the unexpected connection between the monster group M and modular functions, in particular, the j function. The term was coined by John Conway and Simon P. Norton in 1979.. It is now known that lying behind monstrous moonshine is a vertex operator algebra called the moonshine module (or monster vertex algebra) constructed by Igor ...

Monstrous moonshine - Wikipedia

An instanton (or pseudoparticle) is a notion appearing in theoretical and mathematical physics. An instanton is a classical solution to equations of motion with a finite, non-zero action, either in quantum mechanics or in quantum field theory. More precisely, it is a solution to the equations of motion of the classical field theory on a Euclidean spacetime.

Instanton - Wikipedia

Throughout the year, IHES organises numerous events: seminars or informal talks, series of lectures and summer schools or international conferences over one to several days which can bring together a hundred or so participants, who come from Paris and surrounding area, other parts of France or other countries.
