Henri Fayol gained world-wide fame for his 14 general principles of management. He distinguished six general activities for industrial enterprises: technical, commercial, financial, security, accounting and managerial. He defined five functions of management for the management component and these are still seen as relevant to organizations today.

Management of security risks applies the principles of risk management to the management of security threats. It consists of identifying threats (or risk causes), assessing the effectiveness of existing controls to face those threats, determining the risks' consequence(s), prioritizing the risks by rating the likelihood and impact, classifying the type of risk and selecting an appropriate risk option or risk response.
