

## *Western Technology And Soviet Economic Development*

### **Western Technology And Soviet Economic**

Science and technology in the Soviet Union served as an important part of national politics, practices, and identity. From the time of Lenin until the dissolution of the USSR in the early 1990s, both science and technology were intimately linked to the ideology and practical functioning of the Soviet state, and were pursued along paths both similar and distinct from models in other countries.

Soviet foreign trade played only a minor role in the Soviet economy. In 1985, for example, exports and imports each accounted for only 4 percent of the Soviet gross national product. The Soviet Union maintained this low level because it could draw upon a large energy and raw material base, and because it historically had pursued a policy of self-sufficiency.

In western Europe, economic planning is adapted to a diversified economic structure, a dynamic class of business managers, and a long tradition of political and economic liberty. Consequently, although planning implies an extension of the economic responsibilities and activities of the state, the mainspring of economic growth remains the private sector.
